VIRTUAL Conference 2020

Emanuele Paoletto

CDT, CTO

Brief Bio: Visiting Professor at the University of Ferrara, professor of digital technologies the University of Insubria, international speaker, Author of publications in various international scientific. Author of the chapter "The Bass orthopedic system" in "Handbook of Orthodontic Technique, "Orthodontics and implants" in "Orthodontic Technique", published in 1997 by Ortec, "MAPA 3 Dimensional mini implants..." in Temporary Anchorage Device in Orthodontics, second ed.2020. Member of Editorial Board of Quintessence of Dental Technology. Co-ideator of MAPA System, International member GK and OTA & Past President Italian Academy of Technical Orthodontics.

Lecture title: Orthodontic skeletal anchorage in the digital world: a 3D approach combining LMF and DLP technology

Abstract: Is digital technology changing the orthodontic practice? Nowadays many procedures such as clinical acquisition and data processing take place using digital procedures. Additive technologies, such as stereolithography are widely used to build, starting from digital files, dental models in addition to orthodontic and prosthetic devices.

The manufacturing techniques of orthodontic metal devices are also undergoing a major transformation thanks to the introduction of Laser Metal Fusion.

This presentation will show how these technologies can be applied to the standard orthodontic processes and to new applications in the field of orthodontic skeletal anchorage.

GDC development Outcome: C

Dental professionals Conference 30th & 31st October 2020

Venue: Liverpool Marriott, One Queen Square, Liverpool L1 1RH
